IIC Delhi

## TALENT QUEST

If you want a workshop at your organisation, we would love to hear from you!

**The Talent Revolution** is a worldwide movement to empower every human being. We encourage children, adults, professionals, parents, teachers, volunteers... to explore and increase innate talents. We focus on a wide range of current themes in human development and relationships that matter in a particular environment. Besides, we offer a platform to talent based organisations and we are excited to teach every enthusiastic believer to become a Talent coach.

### Talent Walk@Lodhi Gardens

The Believers take you along in the green beauty of Delhi to inspire you and help co-create your future. Our coaches are happy to share their expertise on topics of your interest in little talk groups.

### Talent Festival A feast for families!

The Believers guide the parents through the behaviour of children to explore your child's talents, to understand the clash of talents between families and to leverage the relationship with your child. Children between 8 & 16 years old can participate in an amazing quest to their talents through the day.

### Talent@Work

Worldwide, organisations are recognising that mere skills are not sufficient to ensure success. It is how teams interact, use mutual talents and trust each other, that ultimately makes the difference. Our experts share with you efficient approaches to deal with significant human topics:

- Building high performance
- Team conflict management
- Fulfilling career growth
- Energy loss & burnout
- Succeeding in family business
- Women empowerment

### Talent Quest

A few timeslots are available through the Talent Week. If you want a workshop at your organisation, we would love to hear from you! We provide our Asian & European experts to conduct a two hour' workshop, based on your requirements. Please send your request to our team before 31 december 2013 to ashwin@gurukultrainers.com.

Proceeds of the workshops will be used for the continuance of the India Talent Revolution.
